# Why We Care About Your Memories

## WHY WE ARE DIFFERENT

We understand that your memories are precious. Which is why we offer a free collection and delivery service with is included based on a minimum of 3 tapes/cine films or 20 images.

Each item will have been processed a minimum of three times - most companies simply give you the digitalised file in its raw format.

## WHAT WE OFFER

All of the digital processes include the following:

1. Digitalisation pass
2. File is ripped to appropriate file size and type
3. Colour correction
4. Trim and cropping as required

# Tape

**VHS, VHS-C, Mini DV and 8mm  
VIDEO**

Per tape £15

Post Production

If required we can edit, join together, add titles - simply make your requirements known at the start and we can discuss and advise.

# Cine Film

**8mm and Super 8**

3 inch spool £15.00

5 inch spool £20.00

7 inch spool £35.00

Cine film can be degraded, this can be fading or the film becomes brittle. If it breaks we will join it back together.

# Film and Plates

# Flat Copying

## 35mm, 120 and 5X5" Film

35mm            £1.50

120mm         £3.50

4x5"            £5.50

Glass plate    £5.50

## Discounts

1-50        30% off

50+        50% off

## Prints And Artworks

A4            £8.00

A4-A3        £20.00

A3+          £45.00

With large collections and large items sometimes it is better undertaken on site. If this is the case we charge on a time basis rather than per unit basis. Please get in touch to discuss.

# Output

**There Are Various Ways To Output  
the Digital Files**

DVD                    £4.00

Flash Pen            £8.50

# Why Digitalisation Is important?

Generationally we are at a tipping point. As our parents get older we are handed a baton. My father several years ago presented me with a box. Inside the box was a collection of slides and reels of cine film. His and my mothers life encapsulated in film. It also documented the lives of myself and sister. Little snippets, little memories from all over the world (he was a diplomat).

Being a commercial photographer for over 30 years I had invested in technology to digitise my negatives (pre 1990) and then invested in other technologies to be able to digitise tape, film and audio.

The technology that can replay these

mediums is disappearing at a rapid rate. The last VHS player was manufactured over 6 years ago.

I use my personal experience and knowledge to offer you a great digitisation service that will allow you to preserve and share these great moments.
